This report, based on KEYHOLE photography, supplements NPIC R-192 64 1 pertaining to the Kremovo MRBM Complex, which formerly consisted of 2 Type 1 launch areas (Figure 1).

The Kremovo Fixed Field Site is located adjacent to an improved, loose-surfaced road 6.1 nautical miles (nm) east of Manzovka and 5.7 nm west of Lunza. It is situated in a rugged, forested area approximately 975 feet in elevation. The fixed field site is 11.2 nm north-northeast of Launch Areas No 1 and 2, through Manzovka, over an improved road network.

Launch Areas No 1 and 2 were first seen in [REDACTED]. They were identified as completed or near completion in [REDACTED].

The fixed field site (Figure 2) was seen for the first time in [REDACTED] when the probable area for the ready tents and 1 launch position had been cleared and

apparently leveled for usage. The site remained in this apparently inactive state through [REDACTED].

During the period from [REDACTED] to [REDACTED],

when the field site was again seen, [REDACTED] was identified as complete and apparently operational. The field site presently consists of [REDACTED] launch positions, a clearing probably for 3 large ready buildings tents, a semi-cleared area which probably is used for storage of equipment and billeting of personnel in tents, and 2 other major clearings, the use of which cannot be determined. The site cannot be negated because of a lack of cloud-free photography in this area on [REDACTED]. The launch positions each have an unidentified object, possibly a junction box, on their northern edge. Two small, unidentified buildings can be seen immediately north of the probable ready area adjacent to the main east-west access road. The azimuth of the launch positions cannot be de-

terminated exactly; however it is believed they are oriented on an azimuth of approximately 100 to 120 degrees.

The nearest probable rail-to-road transfer

point is located 4.4 nm from the fixed field site on the eastern edge of Manzovka and is connected to the field site by an improved, loose-surfaced secondary road.
